COMMENT BY PORTFOLIO MANAGERS

Dear investor,

Storm Bond Fund posted a positive return of +0.2% in June and is up +3.6% YTD (institutional IC NOK share class: LU0840158496).

Market sentiment was fragile during the month. Volatility increased amid renewed Middle East tensions and a shift in investor focus toward potential rate hikes following Kevin Warsh's first Fed meeting. Risk assets moved lower in the US with the Nasdaq and S&P falling -2.8% and -1.1%, while Stoxx 600 gained +2.5%. Longer term interest rates in the US increased by +3bps to 4.47%, while the European Benchmark fell by -8bps to 2.86%. In credit markets, US HY spreads increased by +13bps to 270bps and European HY spreads by +6bps to 269bps. On a total return basis, US HY gained +0.3% and European HY gained +0.6%.

The Nordic High yield market remained robust during June and Storm Bond Fund delivered a monthly return of +0.2%. The performance was primarily driven by the attractive coupon carry but was partly offset by weak price performance in Hofseth International and Trustly. Our conviction in these positions remains high and we have selectively added on price weakness. Primary activity in the Nordic High Yield market was high in June with EUR 3.0bn of new issue volume spread across 30 deals.

During the month we participated in three primary issues. Firstly, we took a position in the new Eldorado 4-year USD 425m sr. secured bonds, priced at all in fixed yield of 9.5%. The bonds have first lien security in two contracted ultra-deepwater drilling rigs (UDW's) with firm contracts until 2029. Bonds are well supported by USD 900m (plus USD 510m option) backlog with a steep debt amortization profile. Secondly, we participated in the new Attica 5-year USD 200m sr. secured bonds, priced at all in fixed yield of 11.2%. Attica is a Norwegian Continental Shelf (NCS) E&P independent, which is majority owned by the Lundin Family. Bonds are supported by high quality NCS assets with experienced and strong equity backers. Thirdly, we participated in the new McDermott 5-year USD 550m 1st lien bonds, priced at 10.5% yield and rated BB. McDermott is a leading fully integrated EPCI contractor with USD 18bn in backlog. The bonds are well supported by 1) net cash structure, 2) strong business turn-around, 3) revenue visibility and 4) strong tangible asset backing.

In the secondary market we initiated a position in MPCC 29's, seeing the bonds as largely de-risked with cash prices offering upside to the call structure. Further, we added to our positions in Navigator, Constellation, Vivicta, European Energy, EnQuest, Ithaca and Trustly. During the month, our position in Paratus 26 was called.

We apply a disciplined, bottom-up credit selection process underpinned by a detailed fundamental analysis coupled with robust risk management. We focus on issuers with strong asset backing, solid balance sheets, and proven debt-servicing capacity - resulting in a high-quality, sector-diversified portfolio dominated by resilient Nordic credits that can withstand shifts in inflation and interest-rate expectations. The portfolio currently delivers a 7.5% NOK yield, including ~10% cash, while maintaining limited spread and rate sensitivity with a short credit duration of 2.4 years and modified duration of 1.2 year. We view the current risk/reward profile as attractive, with weighted-average credit metrics consistent with BB/BBB quality. Moreover, our prudent liquidity management - typically maintaining a 5–10% cash buffer - enabling us to mitigate short-term market volatility and seize compelling investment opportunities as they arise.

Nynas AB 25-28	NO0013409847	106.9	9.8%	2.1%	Nynas is a Swedish specialty chemicals company and global market leader in the production of naphthenic specialty products (NSP) and Bitumen. With over 90 years of operational history, Nynas is a leading Nordic bitumen producer . Its products typically account for just 3-7% of customers' total costs, making quality and reliability more critical than price - resulting in high customer stickiness and strong margins. The bond is secured, and has already de-levered to 2.8x post-refinancing. The risk/reward profile appears attractive based on current metrics.
McDermott 26-31	NO0013757294	100.0	11.3%	2.0%	McDermott is a leading global provider of fully integrated engineering, procurement, construction and installation (EPCI) services to the energy industry, with strong positions in offshore oil & gas, LNG and energy transition infrastructure. Following a successful operational turnaround, the company has materially improved contract quality, profitability and cash generation, while building a high-quality backlog with strong earnings visibility. The refinancing materially strengthens the balance sheet, reducing gross leverage to approximately 1.5x and adding $500 million of new equity from existing shareholders. The bond is secured by a first-priority lien over substantially all group assets, offering an attractive risk/reward profile supported by a de-risked business and significantly improved credit metrics.

Current harvest volumes stand at 14k tons with 48k tons of processing volumes. Our investment thesis is supported by 1) a 1L structure ranking pari-passu with bank, 2) modest LTV of ~50%, 3) high quality and tangible asset base, 4) meaningful barriers to entry and 5) a clear roadmap for organic production growth and deleveraging through existing licenses.

The company owns a fleet of 23 vessels making them the largest seismic operator in the world. We deem the credit story attractive due to 1) multi-client cash flow offsetting weak contract market, 2) leverage at 4.6x with deleveraging path via term-loan amortisation and 3) strong market position in a consolidated seismic vessel market.
Neo Next+ Energy 26-31	NO0013754648	99.2	10.8%	1.7%	NeoNext+ is the largest E&P producer on the UK continental shelf, with 250kboed of production and >500mmboe of 2P reserves. The EUR 225m 6Y senior secured bonds were issued at +650bps with strong bond support from low operating leverage (1.6x), robust FCF generation (10% FCF/GIBD 2026e), and strict documentation. Despite sector softness and carve-out risks, the conservative SOTY LTV of <60% helps to mitigate downside risk based on a heavily discounted peer valuation. Further, there is upside to valuation if the carve-out unlocks value through operational focus and multiple re-rating.

This visibility is supported by a contracted backlog with top-tier counterparties, materially de-risking debt service through maturity. In addition, the liquid nature of the underlying asset base provides additional collateral coverage.
