Index description

The Reference Index is a free float-adjusted market capitalization-weighted index that captures the large and mid cap representation of equities across developed and emerging markets countries, with a current aggregate of over 2,400 constituents. The Reference Index is based on the MSCI Global Investable Market Indexes (GIMI) Methodology, further information on which is set out on the Index Provider's website detailed below.

Benefits

Clients benefit from the flexibility of an exchange-traded investment.
Provides access to this segment of the market with a single transaction.
Optimised risk/return profile thanks to a broad diversification across a range of countries and sectors.
The fund offers a high degree of transparency and cost efficiency.
UCITS compliant fund.

Risks

The fund delivers the return of a broadly diversified equity index and may therefore be subject to high fluctuations in value. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID. The returns payable on the fund are dependant on payments received by the fund from the swap counterparty under the terms of the relevant swap and, therefore, are subject to the credit risk of the swap counterparty. In the event that the swap counterparty defaults under the terms of the relevant swap, the fund may suffer a loss. Every fund has specific risks, which can significantly increase under unusual market conditions. Sustainability risks are not considered as part of the Index selection process. Therefore, sustainability risks are not systematically integrated. The fund's assets are passively managed. As a result, the net asset value of the fund's assets is materially dependent on the performance of the underlying investments. Losses that could be avoided via active management will not be offset.

Glossary of key terms

Benchmark

Index against which an investment fund's performance is measured. Also called a reference index.

Beta

A measure of risk which indicates the sensitivity of an investment, such as an investment fund, to fluctuations in the market, as represented by the relevant benchmark. For example, a beta of 1.2 tells us that the value of an investment fund can be expected to change by 12% if the market is forecast to move by 10%. The relation is based on historical data and is only an approximation. However, the closer the correlation between the benchmark and the investment fund, the better this approximation.

Correlation

A measure of the degree to which the price trends of various investment categories or instruments move in the same direction. The correlation quantifies the strength of the relationship as a figure between -1 and +1. The closer the coefficient is to 1, the stronger the correlation. If the coefficient is -1, the investments and the benchmark move in opposite directions. If the value is 0, there is no correlation.

Duration

The duration represents the length of time for which capital is "tied up" in a bond investment. In contrast to residual maturity calculations, the concept of duration takes account of the time structure of returning cash flows (such as coupon repayments). The average duration of the portfolio is derived from the weighted average duration of the individual securities. The "modified duration" is derived from the duration and provides a measure of the risk with which the

sensitivity of bonds or bond portfolios to interest-rate changes can be estimated. A 1% increase (decrease) in the interest level accordingly produces a percentage fall (rise) in the price in proportion to the modified duration. For example: the modified duration of a bond fund is 4.5, the theoretical yield to maturity is 5.3%. If the theoretical yield to maturity drops in the example by 1% to 4.3% due to the decline in interest rates, the fund price increases by around 4.5%. For bond and asset allocation funds, the duration is given for all fixed-income instruments.

Investment grade

Term used to denote securities with ratings of between BBB and AAA, indicating that their credit quality is satisfactory or good.

Sharpe ratio

The Sharpe ratio expresses how much higher (or lower) a return an investor can expect compared to the risk-free rate of interest (e.g. interest rates on savings accounts) per unit of risk (volatility). The risk-free rate of interest varies from currency to currency.

Tracking error

Measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error.

Volatility

In portfolio theory the risk of an investment is measured by the amount of volatility. Risk and return are directly related: Markowitz's portfolio theory posits that a higher return can only be obtained with a higher risk.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.

For marketing and information purposes by UBS. UBS funds under Irish law. Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s). Representative in Switzerland for UBS funds established under foreign law: UBS Fund Management (Switzerland) AG, P.O. Box, CH-4002 Basel. Paying agent: UBS Switzerland AG, Bahnhofstrasse 45, CH-8001 Zurich. Prospectuses, key information document, the articles of association or the management regulations as well as annual and semi-annual reports of UBS funds are available in a language required by the local applicable law free of charge from UBS Asset Management Switzerland AG, c/o UBS AG, Bahnhofstrasse 45, 8001 Zürich, Switzerland or from UBS Fund Management (Switzerland) AG, P.O. Box, CH-4002 Basel. The product described herein aligns to Article 6 Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. Information on sustainability-related aspects pursuant to that regulation can be found on www.ubs.com/funds. The benchmark is the intellectual property of the respective index provider. The fund or the share class is neither sponsored nor endorsed by the index provider. The fund prospectus or supplemental prospectus contains the full disclaimer. Before investing in a product please read the latest prospectus and key information document carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. The details and opinions contained in this document are provided by UBS without any guarantee or warranty and are for the recipient's personal use and information purposes only. This document may not be reproduced, redistributed or republished for any purpose without the written permission of UBS Asset Management Switzerland AG or a local affiliated company.
